Ornamental bed weed control: This is an ongoing challenge all through the year, especially in the areas that have freshly turned soil. To keep the weeds at bay, we will be diligent to spray and pull weeds as we encounter them. They were sprayed last and this week.

Reoccurring Maintenance: Fertilization and Pest/Weed control: Fertilizer for shrubs happened last week. (Sarasota County ordinance prohibits us from applying nitrogenous fertilizer between June 1 and September 30). At different times during the application period we incorporate pre-emergent weed control, and insect control with the turf fertilizer. Other control measures for weeds and pests take place throughout the year. This is a performance based program, and if the severity of the particular problem calls for additional applications, we will reapply treatments as necessary.
