

How to enable the Autofill on your Microsoft computer

Step 1) Open a google or internet page. Click on the  button in the upper-right corner of the screen.

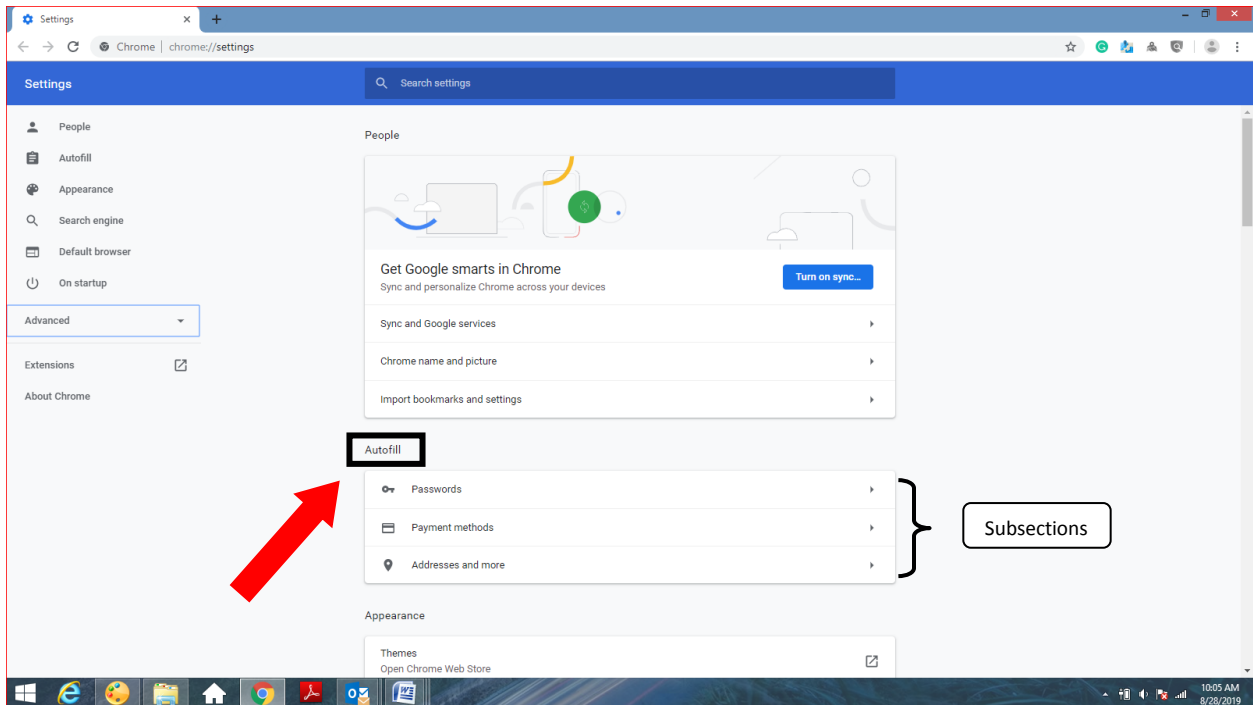

Step 2) Click on settings.

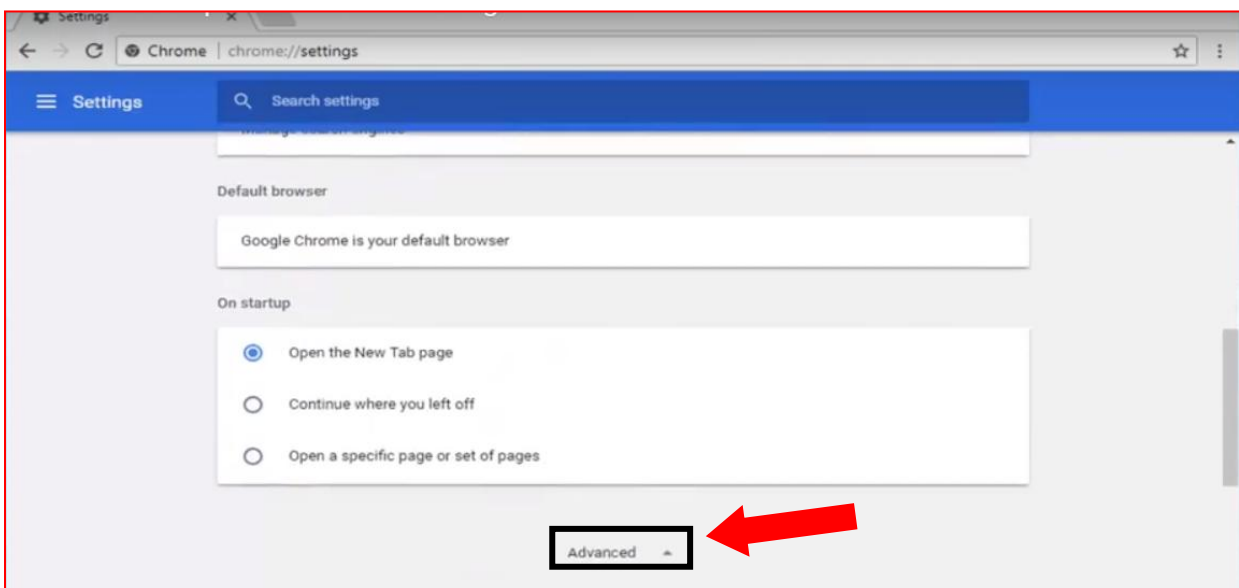

Step 3) The following steps depend on the internet and/or chrome version you currently have. Find which option matches your screen.

Option #1: Under the “Autofill” section, click on each subsections (Passwords, Payment Methods, Addresses and more) to activate the information that you would like the computer to recognize. Move the switch  to turn on the *Autofill*. Fill in the information you want to store. All of it is optional, so it’s up to you how much information you want available for *Autofill*.

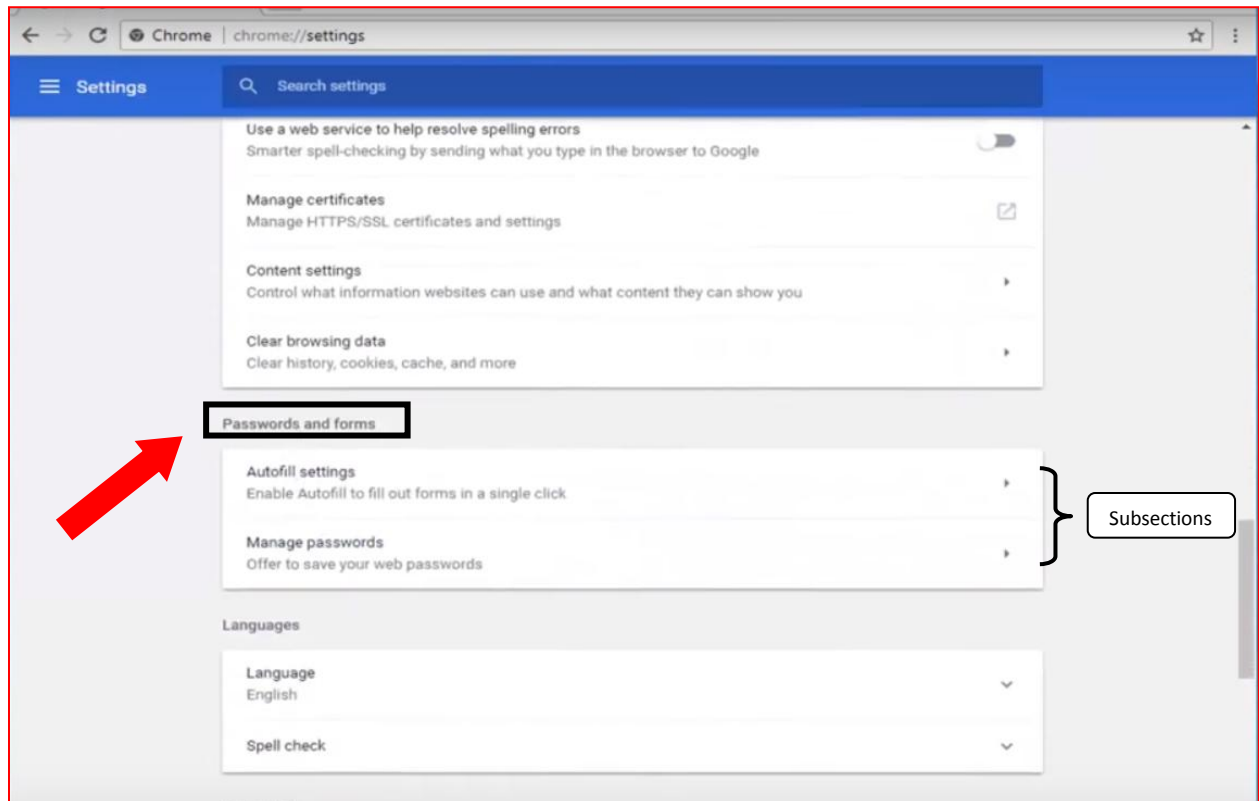

Skip Step 4 – 5, go to Step 6.

Option #2: Scroll all the way down and click “Show Advanced”.

Step 4) Scroll further until you see “Passwords and Forms” section, click on each subsection (Autofill Settings and Manage Passwords) to activate the information that you would like the computer to recognize. Move the switch  to turn on the *Autofill*. Fill in the information you want to store. All of it is optional, so it’s up to you how much information you want available for *Autofill*.

Step 5) Once you completed the previous step, exit out of the page and try out your *Autofill*.
