| Washingtonia Palm       | Washingtonia robusta     | 8           |

## SUGGESTED PLANT LIST FOR THE ISLES OTHER PALMS OF INTEREST

### Canary Island Date Palm

**Botanical Name:** *Phoenix canariensis*

**Comments:** Beautiful, large growing palm. May be overpowering in home landscape. Planted on Palmer Ranch in the medians on Honore Avenue.

## SUGGESTED PLANT LIST FOR THE ISLES OTHER PALMS OF INTEREST

**Pindo Palm**

**Botanical Name:** *Butia capitata*

**Comments:** Slow growing to 20' with long feathery fronds; full sun.

## SUGGESTED PLANT LIST FOR THE ISLES OTHER PALMS OF INTEREST

**Royal Palm**

**Botanical Name:** *Roystonea regia*

**Comments:** Very large, impressive palm growing to 80'. Too large for most places but there are some specimens on Palmer Ranch.

SUGGESTED PLANT LIST FOR THE ISLES  
OTHER PALMS OF INTEREST

**Saw Palmetto, dwarf**

**Botanical Name:** *Serenoa repens*

**Comments:** Native Florida palm; sun to shade. Use as groundcover or understory. Spreads slowly by rhizomes; silver variety is preferable. Blooms spring and summer; fruit is desired by wildlife.

SUGGESTED PLANT LIST FOR THE ISLES  
OTHER PALMS OF INTEREST

**Spindle Palm**

**Botanical Name:** *Hyophorbe verschaffeltii*

**Comments:** Slow growing to about 20'; straight trunk; best in full sun.

## SUGGESTED PLANT LIST FOR THE ISLES OTHER PALMS OF INTEREST

**Sylvester Palm**

**Botanical Name:** *Phoenix sylvestris*

**Comments:** Looks similar to a compact Canary Island Date palm. Slow growing to 40'; diamond-shaped leaf scars on trunk.

## SUGGESTED PLANT LIST FOR THE ISLES OTHER PALMS OF INTEREST

### **Washingtonia Palm**

**Botanical Name:** *Washingtonia robusta*

**Comments:** Fast growing and beautiful when young. As they age, the old fronds persist and form a 'petticoat' which is unsightly.
